

A Sun Is Not a Gas Sphere: Illustrated Science

Filesize: 8.28 MB

Reviews

This ebook is indeed gripping and fascinating. it had been writtern really properly and helpful. I am very easily could possibly get a satisfaction of reading a published publication.

(Maude Ritchie)

A SUN IS NOT A GAS SPHERE: ILLUSTRATED SCIENCE

Createspace Independent Publishing Platform, United States, 2016. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.It is not possible for the Sun to be a sphere of hydrogen gas that is powered by nuclear fusion from within. Many epicycles have been invented to make the concept seem plausible. All evidence points to the only possible fact that the Sun is a plasma star that is externally powered with plasma fusion occurring at its surface. The difference between the two models, which are opposite in nature, is enormous. Ironically, the Hydrogen-Sun model, which is not physically possible, is being taught in the schools, while the Plasma Sun model, for which evidence exists, is being hidden from view. The reason may be that it is difficult for people not familiar with plasma physics, to see the universe as a Plasma Universe, even while research reveals that 99.9999 of the mass of the universe exists in the plasma state; in the form of free-flowing protons and electrons. In plasma fusion on the surface of a sun, plasma is combined into atomic elements, with energy being generated in the process. The atoms for all the planets and gases in a solar system are synthesized at the surface of the Sun, which actually powers the solar process. The synthesizing plasma fusion is presently enhanced for our Sun by electromagnetic Primer Fields focusing interstellar plasma onto the Sun in a highly condensed manner. When the plasma-focusing system becomes inactive, below the required threshold conditions, the Sun reverts to a type of cosmic default level with 70 less energy being radiated, and higher rates of solar cosmic-ray flux are being experienced. At the present rate of plasma diminishment being experienced, the solar activity phase-shift threshold to the...
